Liechtenstein
Norway grants

Programme **Kappa**

T A
C R

Project No.: T001000198

Acronym: NASPMON

**NAtural Seismicity as a Prospecting
and MONitoring tool for geothermal
energy extraction**

**Supplement of V2: Upgrade of the
REYKJANET network to on-line, real time
data transfer**

**The project NASPMON benefits from a € 1 370 000 grant from Iceland,
Liechtenstein and Norway through the EEA Grants and the Technology
Agency of the Czech Republic within the KAPPA Programme.**

Example of station HRG (Hrútagjá) before and after the Internet connection was installed

Before the 4G/LTE connectivity, we used GPS to send status SMS each 48 hours. With mobile internet connection the health status of the stations is monitored continuously in real time.
